

User manual

First run

After first running Library system app, customer must create own account. This can be done after clicking on register button. After clicking on register button, register page is opened and customer can fill credentials for future login. After creating account customer can login by putting CPR number and password and click login. After login in customer is redirected to the main menu, where 4 different actions can be chosen – library items, my items, edit user, log out.

Library items

If customer choses to open Library items, then window with library items is opened. On the top of the window are a search fields, where customer can filter results by title of the item or the category. In the left bottom corner is a back button which will redirect customer to the main menu of the app. After finding item, borrow item can be clicked and window with information about this item is open. By clicking proceed button item is borrowed, if it is available. If it isn't then pop up window is shown and informs customer about reservation of this item. After clicking confirm button item is reserved.

My items

In this window, customer can choose item, which can be returned. After highlining item return button can be clicked and item is returned. If item is not borrowed but customer is in queue for it, item cannot be returned, and customer is informed about its reservation.

Edit user

When customer wants to change his credentials, then it's done in this window. Customer can change name, address, password and credit card information. After filling all information and clicking on Change button, credentials are changed.

Log out

Log out button is used for logging out customer from library app and after logging out customer is redirected to the login window of the app, where can be logged in again.

In all windows in the left bottom corner is a back button which will redirect customer back, to the main menu of the app.
